Highly skilled software developer with over 5 years of experience in designing, developing, and deploying web application programs that expedite the efficiency and effectiveness of organizational success. Leveraged RESTful services to increase user engagement and implemented data security measures that increased customer data storage by 40%. Successful in backend development, designed and implemented an efficient workflow system which reduced the time to market for web applications by 25%.

Skill Highlights

- Restful API, GraphQL API
- HTML, CSS, JavaScript, PHP, ReactJS
- Laravel, CodeIgniter, NodeJS, NestJS
- Third-Party API Integration
- Authentication & Authorization
- Test Driven Development
- Continuous Integration/Delivery
- Web Application Design & Architecture
- AWS, Azure & Google Cloud
- MySQL, MongoDB, PostgreSQL
- Microservices architecture
- Version Control (Git)
- Agile & Scrum Methodologies
- Excellent orator with great presentation skills
- Active Collaboration
- Problem-solving and analytical thinking

Experience

Backend Developer   **February 2022 to Till Date**
Lagos State Health Management Agency, Ikeja Lagos

- Designed and implemented a scalable, high-performance Node.js API that improved the overall speed and reliability of the LASHMA's web application by 25%.
- Implemented secure authentication and authorization solutions, ensuring the protection of sensitive customer data and reducing the risk of security breaches by 40%.
- Led the development of a MongoDB database system, streamlining data management and increasing data processing speed by 50%.
- Improved overall code quality and efficiency through regular code reviews and collaboration with other developers, resulting in a 25% decrease in bugs and support tickets.
- Carry out quality assurance tests to discover errors and optimize usability.

System Administrator   **January 2021 to January 2022**
Octosoft Technologies, Yaba Lagos

- Lead administrator for system level performance optimization and system monitoring.
- Part of a team that developed an inventory management system which led to resolving the frequent discrepancies between the recorded IT asset inventory levels and the actual inventory levels.
- Proactively identified and decommissioned unused hardware resources reducing operational costs by 15%.
- Assessed system problems with the network, application or hardware components by running diagnostics, trying solutions and upgrading devices when necessary.
- Problem-solved, diagnosed and corrected systems to ensure functional objectives were met.

Database & Web Administrator   **November 2019 – December 2020**
Eleganza Industrial City RAO, Ajah Lagos

- Became a subject matter expert in a specific area of the application, leading the development of new features and contributing to the company's long-term strategic vision.
- Gathered, analyzed, or documented user feedback to locate or resolve sources of problems.
- Carried out quality assurance tests to discover errors and optimize usability to improve application performance.
- Perform diagnostic tests, fix bugs, and provide technical support to users.

Education

Higher National Diploma: **Computer Science** – 2019
Moshood Abiola Polytechnic, Abeokuta

Certifications

Software Developer (In-View)
Backend Developer (NodeJS)
Project Management Essential
Succeeding as a First-Time Tech Manager

Award

Best Staff Winning – 3rd Quarter 2023
